

SSMHealth MyChart Share Your COVID-19 Vaccination and Testing

As you start to go back to work, travel, or attend events such as a concert or sporting event, you might be asked if you're vaccinated for COVID-19 or if you have recent test results. You can share your information quickly, easily, and securely, right from MyChart by:

- Generating barcodes that can be scanned right from your mobile device. •
- Downloading a PDF document that includes your vaccination barcode. (Test result barcodes are • not included in the PDF.)
- Exporting your information to another application. •

The barcodes that appear in MyChart are created according to an open industry standard called SMART Health Cards. They contain verified information and only what is relevant to COVID-19, including legal name, date of birth, COVID-19 vaccination information, and your most recent COVID-19 test result. You decide how much to share and with whom-you can share only your test results, only your vaccination information, or both.

Generate a Barcode

- 1. Log in to your MyChart account.
- 2. Select Your Menu, then COVID-19.
- 3. Click QR Codes.
 - If you have both COVID-19 vaccinations and test results on file, you'll have separate • barcodes for each.
